Projects

Fresh Cart - E-Commerce Web Application

FreshCart is a full-stack e-commerce web application designed to provide users with a seamless online shopping experience. The platform allows customers to browse products, view detailed information, add items to the cart, and place orders. It is built with a React.js frontend for a modern, responsive user interface and a Node.js + Express backend for efficient server-side operations. Product data is dynamically fetched from a MongoDB database, ensuring scalability and flexibility.

July 2025 - February 2026

Key Features:

User-friendly interface with dynamic product listing.

Shopping cart functionality with real-time updates.

Order placement and management system.

Backend APIs for product retrieval and order handling.

Responsive design for mobile and desktop compatibility.

Tech Stack:

Frontend:

React.js, HTML5, CSS3, Tailwind CSS

Backend:

Node.js, Express.js

Database:

MongoDB

Tools & Practices:

REST APIs, Git, VS Code

Volunteering

G.N. Khalsa College

Team Leader - (IT Fest)

January 2023- 2024-2025

Mumbai

Professional Strength

Problem & Solving & Debugging

Write Clean Code with Following File Structure

Maintain Clean Code & Documentation

Technical Skills

Programming & Development

C++, Java, Python, OOP, DSA

Web & App Development

Html5, CSS (Taliwind, Bootstrap), JavaScript(ES6+), ASP.NET

DataBases

MySQL, MongoDB

Tools & Platforms

Version Control

Git / GitHub

Code Editors

IntelliJ IDEA, Vs Code, Visual Studio, Notepad, PyCharm
